

Quality and Environmental Policy

We are committed to continually improve our business process to achieve customer satisfaction with professional consultancy services and on time delivery of projects.

We are committed to continually improve our environmental management system with the aim to achieve waste reduction, pollution prevention and conservation of natural resources.

Compliance

We will comply with applicable environmental statutory, regulatory requirements and ISO 14001 Environmental Management System Standards.

Commitment

We will initiate appropriate reduce, reuse and recycle measures to protect the environment, conserve energy and natural resources, and prevent pollution, and actively promote recycling both internally and amongst our clients and suppliers.

Communications

We will communicate our environmental policy to our clients, staff and suppliers. We will educate all employees and create environmental awareness to prepare them to take personal accountability for protecting the environment.
